1. PEOC Operational Outlook – Next 24 hrs:
 - a. Extreme cold temperatures down to -50°C with the wind chill across the North. Up to 20 cm of snow is possible across Southern Ontario and portions of Central Ontario with the highest amount forecast in the Southwest. See para 4 and Annex C for more details.
2. Significant Incidents / Emergency Events – Previous 24 hrs:
 - a. Provincial: Nil.
 - b. National: Nil.
 - c. International: Nil.
3. Ongoing Incidents:
 - a. On 2022-01-28, a large-scale vehicle convoy demonstration against a COVID-19 vaccine mandate began in Ottawa. As of 2022-02-01, the protest continues to grow smaller, however protest activity is expected to continue. See the latest incident summary for additional details.
 - b. On 2022-01-31, Kashechewan First Nation submitted a request for assistance (RFA) due to COVID-19, which was approved on 2022-02-02. See *IMS209-004_H1-COVID-19-Kashechewan FN* for more information. A key partners' call is scheduled for 2022-02-02.
 - c. On 2022-01-28, Peawanuck First Nation submitted a request for assistance to support a community lockdown due to a COVID-19 outbreak. See *PEOC IMS209-001-H1-COVID-19 – Peawanuck FN* for more information. An all-partners call is scheduled for 2022-02-03.
 - d. On 2022-01-03, Aroland First Nation declared an emergency due to a COVID-19 outbreak. See *PEOC IMS 209-004 H1 COVID-19 Aroland FN* for more details. A key partners' call is scheduled for 2022-02-02.
 - e. On 2022-01-06, Attawapiskat First Nation submitted a request for assistance (RFA) due to COVID-19, which was approved on 2022-01-14. See *PEOC IMS 209-006 H1 COVID-19 Attawapiskat FN* for more details. A key partners' call is scheduled for 2022-02-02.

Provincial Emergency Operations Centre (PEOC)
Daily Consolidated Situation Report (DCSR)
For Official Use Only – Not for Redistribution

4. Three Day Significant Weather Forecast. See Annex C for more details.

	Day 1: Wednesday	Day 2: Thursday	Day 3: Friday
North	Temperatures are expected to be as low as -50°C with the wind chill in portions of the far North and as low as -40°C with the wind chill in the Northwest and upper Northeast.	Temperatures as low as -45°C with the wind chill are possible in the far North and the majority of the Northwest far and as low as -40°C with the wind chill from North and East of Lake Superior to James Bay.	Temperatures as low as -45°C with the wind chill are possible in the far North and as low as -40°C with the wind chill for most of Northern Ontario. There is the potential for lake effect snow along the Northern portion of Lake Superior.
South	Up to 20 cm of snow is possible from Windsor to London. Lower amounts of snow between 2-15 cm is possible in the rest of Southern, Eastern, and portions of central Ontario with the highest amounts forecast in the interior of Southern Ontario from London to the Ottawa area. While confidence is low there is the possibility of freezing rain or ice pellets in the Niagara area and along the Northern portion of Lake Ontario. Ice accretion is forecast to be minimal.	Up to 10 cm of snow and blowing snow is expected from Windsor to the Ottawa area with higher amounts from Northern Lake Erie to Ottawa.	Temperatures as low as -35°C with the wind chill are possible from North of London to Ottawa and west into central Ontario. There is the potential for lake effect snow South or Southeast of Lake Huron though the exact track of the system is uncertain at this time.
Impacts	Winter weather: (blizzard, blowing snow, flash freeze, freezing drizzle, freezing rain, snowfall, snow squall, winter storm, etc.): Critical infrastructure disruptions (e.g. due to ice accumulation) including power outages, property and structural damage; transportation disruptions (slippery & poor road conditions, road closures, delay or cancellation of travel means, etc.); a strain on the health system; poor visibility; and unsafe outdoor conditions. Extreme cold: Causes a greater strain on energy sector with an increased demand for heat. Human health risk due to exposure (e.g. hypothermia).		

Provincial Emergency Operations Centre (PEOC)
Daily Consolidated Situation Report (DCSR)
For Official Use Only – Not for Redistribution

5. COVID-19 (H1):

- a. Provincial: All COVID-19 case, and outbreak data reflect totals from 1:00 the previous day. ICU data reflects totals from 23:59 the previous day.
 - (1) The Government of Ontario reports as of 2022-02-02 at 10:31:
 - (a) 1,039,825 confirmed COVID-19 cases in the province,
 - (b) 986,715 total resolved cases,
 - (c) 3,909 new cases of COVID-19,
 - (d) 11,576 total fatalities,
 - (e) 2,939 hospitalized for COVID-19,
 - (f) 555 in ICU due to COVID-related illness.
 - (2) COVID-19 Measures:
 - (a) On 2022-01-31, Ontario began a phased easing of public health measures, while maintaining protective measures. Ontario will continue this phased approach with the lifting of additional public health measures on 2022-03-14.
 - (b) The Ontario COVID-19 Advisory Table released updated COVID-19 projections indicating that while challenges exist in modelling due to changes in testing, other indicators suggest this phase of the Omicron wave has plateaued or is in decline. They also expect hospitalizations and ICU cases to rebound following the reopening of Ontario on 2022-01-31, and pressures on the ICUs will be prolonged.
 - (c) Orders currently in effect under the *Emergency Management and Civil Protection Act* have been extended until 2022-02-09.
 - (d) Orders under the *Reopening Ontario Act* have been extended until 2022-02-14.
 - (e) See Annex E for orders under the EMCPA and the Reopening
 - (3) [COVID-19 Vaccine Plan](#): All data reflects totals from 20:00 the previous day.
 - (a) The Government of Ontario [reports](#) as of 2022-02-02 at 10:30:
 - i. 64,978 daily doses administered,
 - ii. 30,772,309 total vaccine doses administered,
 - iii. 11,756,159 people are fully vaccinated.
 - iv. 91.9% of eligible Ontarians 12 years and older have received at least one dose of a COVID-19 vaccine and 89.3% of Ontarians 12 years and older have been fully vaccinated.
 - v. 89% of eligible Ontarians 5 years and older have received at least one dose of a COVID-19 vaccine and 83.9% of Ontarians 5 years and older have been fully vaccinated.
- b. National:
 - (a) The Government of Canada [reports](#) 3,066,903 total confirmed COVID-19 cases in Canada, 2,829,107 total resolved cases, and 34,033 total fatalities as of 2022-02-02 at 09:00 EST.

Provincial Emergency Operations Centre (PEOC)
Daily Consolidated Situation Report (DCSR)
For Official Use Only – Not for Redistribution

- (b) To limit the further spread of coronavirus in Canada, [travel restrictions](#) are in place across all border crossings.
- c. International:
 - (1) The World Health Organization (WHO) [reports](#) globally, a total of 376,478,335 confirmed COVID-19 cases with 5,666,064 fatalities as of 2021-02-01 at 11:35 EST.

ANNEX A – PUBLIC ALERTING

Alert Ready in Ontario is part of a national service designed to deliver critical and potentially life-saving emergency alert messages to Canadians in both official languages. Emergency Broadcast Intrusive (BI) alerts are distributed on radio, TV, and compatible wireless devices to ensure that Ontarians have information they need in emergencies. BI alerts will interrupt all/any TV and radio programs being broadcast at the time, including people using a wireless compatible device who are in the area of concern.

Emergency Management Ontario (EMO) is the authorized distributor of emergency BI alerts for Ontario. BI alerts are distributed via the Provincial Emergency Operations Center (PEOC) duty office.

Recognized Officials that can request BI alerts for their jurisdiction through the PEOC Duty Office, include: CEMC & Alternate, Mayor, First Nations Chief, MEMC & Alternate, or senior Ontario government official.

1. Recognized officials will:
 - a. Specify the category of an alert.
 - b. Create the content of the BI message.
 - c. Confirm when a BI alert is to be distributed.
 - d. Identify the geographical areas covered by the alert.
 - e. Ensure a BI alert, including content, is updated and/or cancelled as required.
 - f. Provide additional BI alert information as requested.
2. Alert Approval. A Recognized Official must provide the following information to the PEOC duty office before any BI alert message is dispatched.
 - a. Their full name, Title/Position, 24/7 contact phone number and e-mail address.
 - b. 24/7 contact information (if requested) of an alternate official who can authenticate the Recognized Official's identity.
3. Alert Criteria. A BI alert must meet the following criteria:
 - a. A confirmed and verifiable incident
 - b. That there is an immediate or imminent threat to life, or a serious threat to public health, safety and security, or substantial damage to property.
4. Alert Content. The requesting entity must provide the following confirmed, and verifiable, information to the PEOC duty office:
 - a. **Threat or Incident** – A description of the threat or incident
 - b. **Boundaries** – A detailed description of the boundaries of the alert area
 - c. **Actions** – A detailed description of actions members of the public should take to protect themselves from the threat or incident. Including, how the recipients can obtain additional information (phone numbers, web sites etc.)
 - d. **Time Limit** – An expiry date and time (usually no longer than two hours) and
 - e. **French Translation** – A French translation of the alert must accompany the English version.
5. Once all conditions have been met, the requesting entity can request the PEOC Duty Office (416-314-0472) to distribute a BI alert.

For more information, go to www.alertready.ca or call the PEOC Duty Office (416-314-0472).

ANNEX B – THREAT ASSESSMENT FOR EXTREME COLD AND SNOW

Impacts to Health

Extreme cold puts everyone at risk however, the risks are greater for young children, older adults, and people with chronic illnesses, people working or exercising outdoors, and those without proper shelter. Adverse health effects can occur as a direct result of exposure to excessive cold such as hypothermia and frostbite.

Signs/Symptoms	
Hypothermia	Frostbite
Shivering, exhaustion, confusion, fumbling/uncoordinated movements, memory loss, slurred speech, drowsiness.	White/grayish skin area, skin that feels unusually firm or waxy, or numbness.

Consult a healthcare provider or call Telehealth Ontario (1-866-797-0000 or TTY at 1-877-797-0007) if you experience any of the above symptoms.

Emergency managers should make staff and the public aware, or remind them of the following protective measures and best practices:

- If you must go outside, cover up and dress warmly with several layers. The outer layer should be wind resistant. Frostbite can develop within minutes to exposed skin, especially with wind chill. Avoid overexertion when shovelling snow and take several breaks.
- Check on older family, friends and neighbors.
- Bring pets inside and move livestock to sheltered areas with non-frozen drinking water.

Impacts to Critical Infrastructure

Accumulating snow and/or extreme cold can damage/disrupt critical infrastructure which could result in power outages, road closures, delay or cancellation of air or other travel means, major traffic accidents, burst pipes, etc. Travel may be hazardous due to sudden changes in the weather. Accumulating snow may cause surfaces such as highways, roads, walkways and parking lots to become difficult to navigate. Visibility may be suddenly reduced at times due to heavy or blowing snow.

Emergency managers should make staff and the public aware, or remind them of the following protective measures and best practices:

- Carrying an emergency car kit and a mobile phone, as well as keep others informed of travel schedules and destinations.
- Prepare a 72-hour emergency kit in the event that there is a power outage or other impacts to critical infrastructure, as well as consider and prepare alternative means for heat that are safe indoors.
- Continue to monitor local forecasts for public weather alerts and exercise appropriate caution if you must travel.

ANNEX C – WEATHER

ONTARIO VIGILANCE BULLETIN

**Ontario Storm Prediction Centre, Meteorological Service of Canada
Issued: Tuesday, February 1, 2022**

WEATHER THREATS AT-A-GLANCE

Threat Level	Wednesday 2022-02-02	Thursday 2022-02-03	Friday 2022-02-04	Saturday 2022-02-05	Sunday 2022-02-06	Monday 2022-02-07
Hazards	Cold Snow Uncertain (Freezing Rain)	Cold Snow Blowing Snow	Cold Uncertain (Snow)	Cold Uncertain (Snow)	Cold	Cold Uncertain (Snow, Blowing Snow)
Significant Weather						

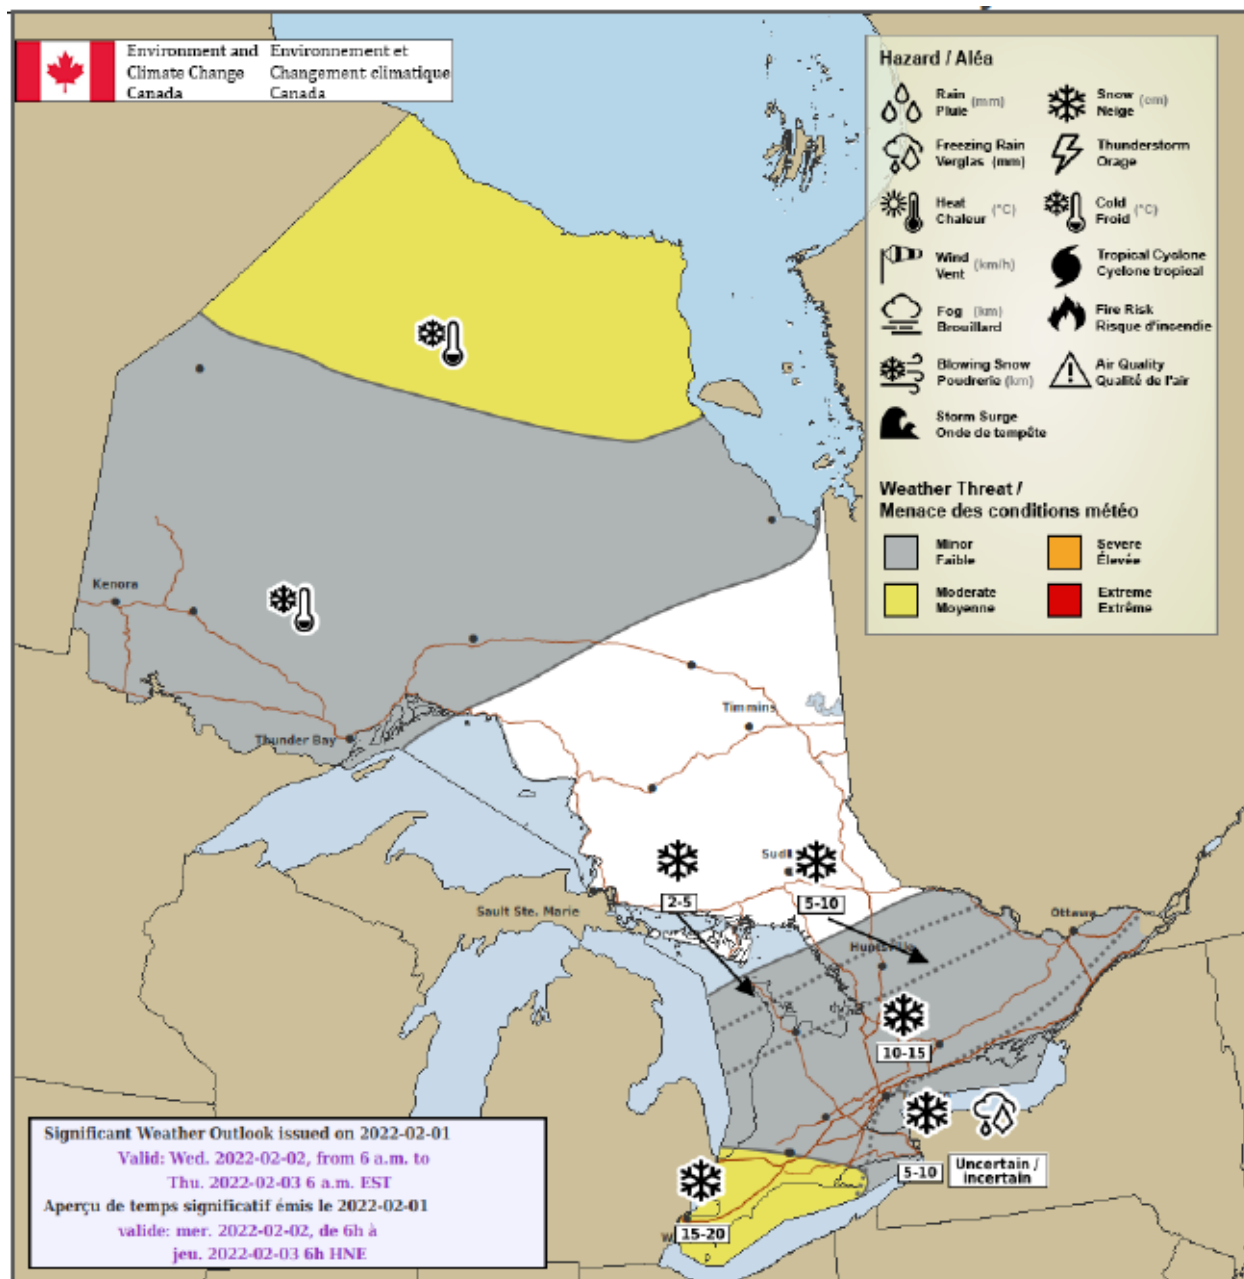

Please click on thumbnails or scroll down to view larger maps with forecast discussions.

IMPACT THREAT LEVELS

	Uncertain impacts. Watch for future updates.
MINOR	Minor or isolated impacts expected. Weather phenomena is potentially significant. Stay informed.
MODERATE	Moderate impact expected. Weather phenomena is hazardous and may be occasionally dangerous. Be vigilant.
HIGH	High impact expected. Weather phenomena is dangerous. Be extra vigilant.
EXTREME	Extreme impacts expected. Weather phenomena is exceptionally dangerous. Absolute vigilance required.

Provincial Emergency Operations Centre (PEOC)
Daily Consolidated Situation Report (DCSR)
For Official Use Only – Not for Redistribution

Significant Weather Outlook: Wednesday 2022-02-02

Discussion

Location: Portions of far northern Ontario.

Impacts: Very high risk of frostbite. Exposed skin can freeze in 5 to 10 minutes. Very high risk of hypothermia if outside for long periods without adequate protection. Wind chills of minus 50 can pose a severe frostbite risk where exposed skin can freeze in 2 to 5 minutes.

Confidence: Medium.

**Provincial Emergency Operations Centre (PEOC)
Daily Consolidated Situation Report (DCSR)
For Official Use Only – Not for Redistribution**

Description: Wind chill values between minus 40 and minus 50 are possible Wednesday morning and night.

Location: Portions of northern and northwestern Ontario

Impacts: High risk of frostbite. Exposed skin can freeze in 10 to 30 minutes. High risk of hypothermia if outside for long periods without adequate protection.

Confidence: Medium.

Description: Wind chill values between minus 35 and minus 40 are possible Wednesday morning and night.

Location: Portions of southern Ontario.

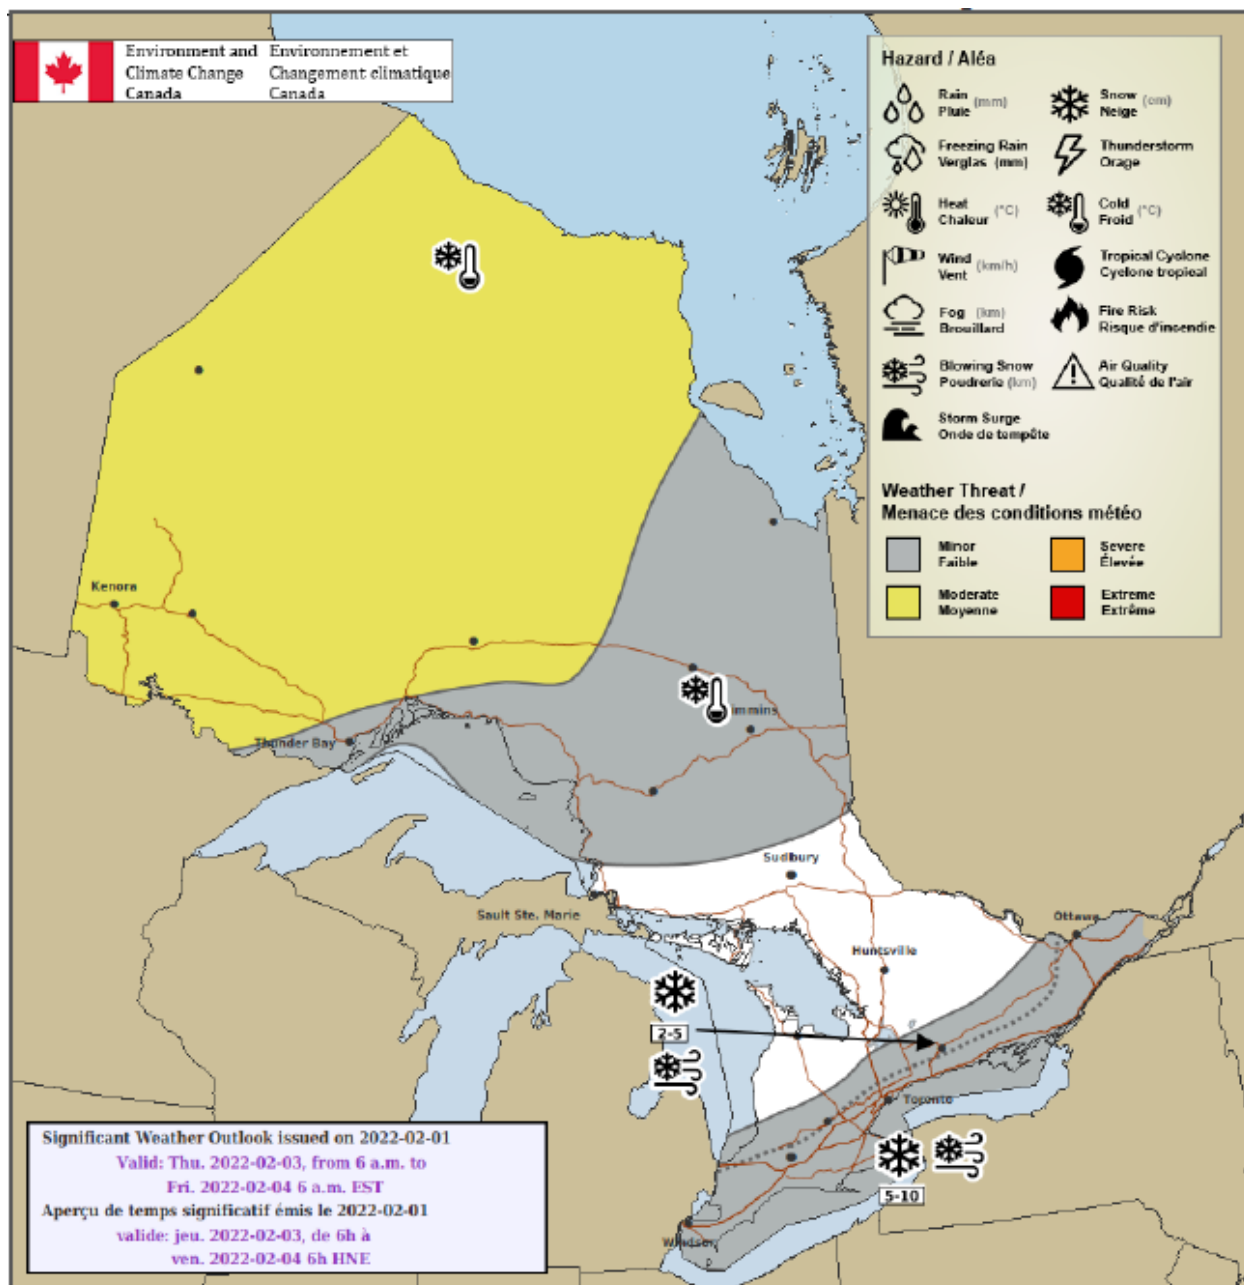

Impacts: Hazardous winter travelling conditions from accumulating snow.

Confidence: Medium.

Description: Snow is expected to spread across most of southern Ontario. A widespread snowfall appears likely with amount of 15 to 20 cm possible over parts of Southwestern Ontario. 10 to 15 cm of snow appears possible across a large part of southern Ontario including the Golden Horseshoe to the Ottawa area. Freezing rain or ice pellets are possible at times over Niagara and perhaps near Lake Ontario in the Trenton to Kingston areas. Confidence is low at this point concerning the freezing precipitation.

Provincial Emergency Operations Centre (PEOC)
Daily Consolidated Situation Report (DCSR)
For Official Use Only – Not for Redistribution

Significant Weather Outlook: Thursday 2022-02-03

Discussion

Location: A large portion of northwestern and far northern Ontario.

Impacts: Very high risk of frostbite. Exposed skin can freeze in 5 to 10 minutes. Very high risk of hypothermia if outside for long periods without adequate protection.

Confidence: Medium.

Description: Wind chill values between minus 40 and minus 45 are possible Thursday morning.

Provincial Emergency Operations Centre (PEOC)
Daily Consolidated Situation Report (DCSR)
For Official Use Only – Not for Redistribution

Location: Areas north and east of Lake Superior towards James Bay.

Impacts: High risk of frostbite. Exposed skin can freeze in 10 to 30 minutes. High risk of hypothermia if outside for long periods without adequate protection.

Confidence: Low.

Description: Wind chill values between minus 35 and minus 40 are possible Thursday morning.

Location: Portions of southern Ontario.

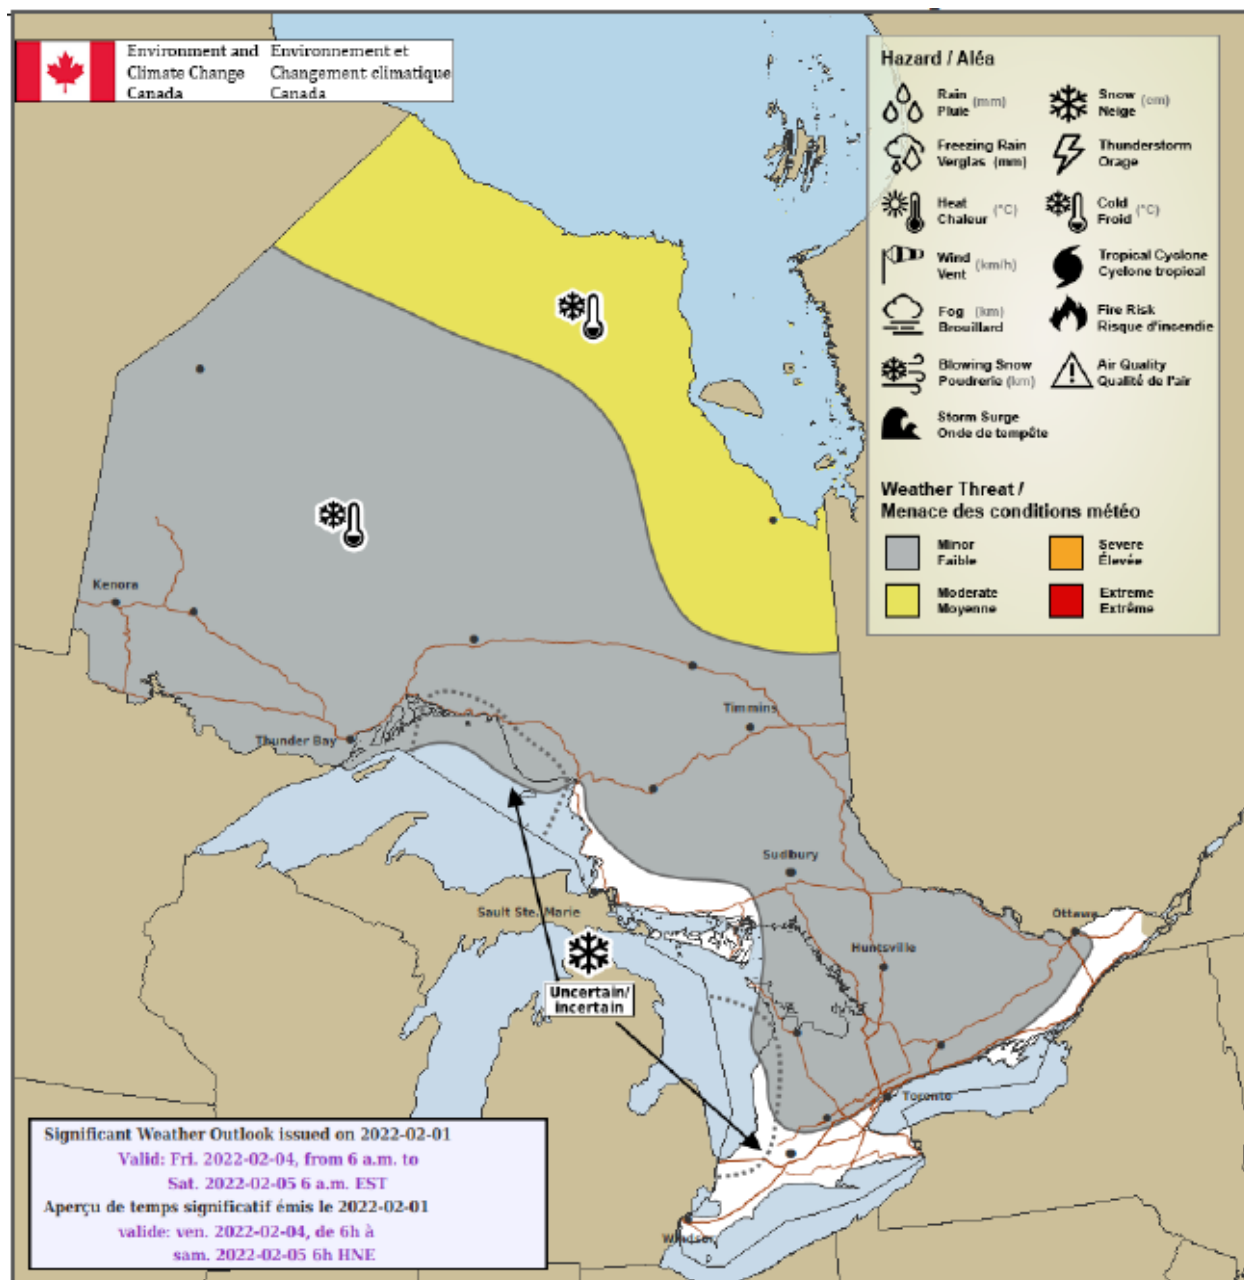

Impacts: Hazardous winter travelling conditions from accumulating snow and local blowing snow.

Confidence: Low.

Description: Snow will affect a large part of southern Ontario with the highest amounts expected near the north shore of Lake Erie into Niagara toward eastern Ontario and Ottawa. There remains uncertainty as to the exact snow amounts, which will depend on the track of a strong low pressure area that is expected to be over the Appalachians in the United States. .

Provincial Emergency Operations Centre (PEOC)
Daily Consolidated Situation Report (DCSR)
For Official Use Only – Not for Redistribution

Significant Weather Outlook: Friday 2022-02-04

Discussion

Location: Far northern Ontario.

Impacts: Very high risk of frostbite. Exposed skin can freeze in 5 to 10 minutes. Very high risk of hypothermia if outside for long periods without adequate protection.

Confidence: Low.

Description: Wind chill near minus 45 are possible Friday morning.

Provincial Emergency Operations Centre (PEOC)
Daily Consolidated Situation Report (DCSR)
For Official Use Only – Not for Redistribution

Location: Most of northern Ontario.

Impacts: High risk of frostbite. Exposed skin can freeze in 10 to 30 minutes. High risk of hypothermia if outside for long periods without adequate protection.

Confidence: Low.

Description: Wind chill values between minus 35 and minus 40 are possible in many areas Friday morning.

Location: Central and parts of southern Ontario.

Impacts: High risk of frostbite. Exposed skin can freeze in 10 to 30 minutes. High risk of hypothermia if outside for long periods without adequate protection.

Confidence: Low.

Description: Wind chill values between minus 30 and minus 35 are possible in many areas Friday morning.

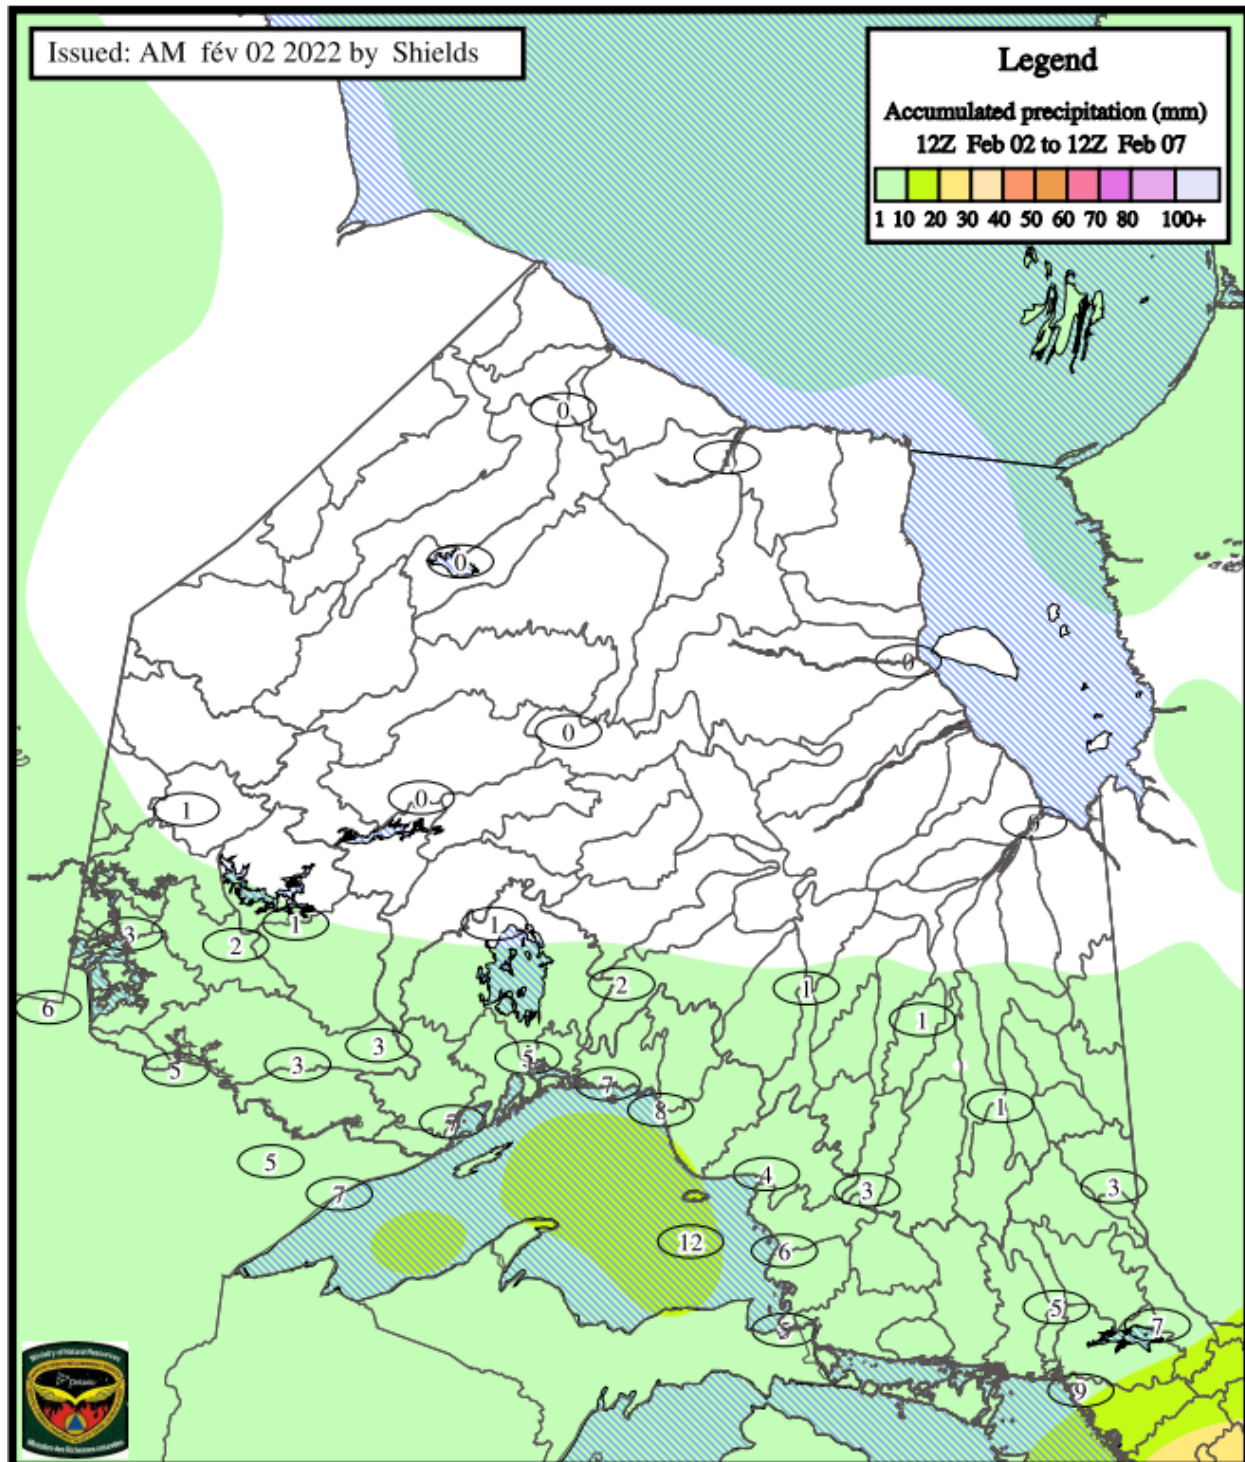

Location: Portions of southwestern Ontario near Lake Huron

Impacts: Hazardous winter travelling conditions from accumulating snow.

Confidence: Uncertain.
